

The KTS Sustainable Development Policy

KTS is a business focused on delivering a consistently high standard of events on behalf of our clients.

We are committed to regular review and continual improvement of our business' environmental, social and economic sustainability. We are increasingly offering options to allow our clients to do the same through their events. The focus of our sustainability objectives is influenced by interested parties whom we consider together with the broader business context as part of our reviews.

We value the governing principles outlined in ISO20121 ie stewardship, inclusivity, integrity and transparency and comply with all relevant statutory requirements and have incorporated frameworks within our Quality Management System to reflect these. Adherence to these processes and procedures is measured and recorded through audits resulting in continual improvement.

We have processes in place to ensure that we make our expectations in relation to sustainable practices clear to suppliers and where possible, will only contract with those who commit to similar standards and principles. A number of our suppliers have their own sustainability policy and have committed to ongoing positive change.

The KTS management systems comply with all relevant statutory requirements and are defined in our processes and procedures. New members of the team are fully inducted and longer serving team members are assessed on an on-going basis to ensure understanding of the KTS management systems, policies and objectives. Freelance staff are inducted and / or briefed as necessary depending upon the breadth of their role.

Katie Savage

Managing Director, KTS Events
